# Autologin auf Cisco-Switch mittels expect

Dieses Script ermöglicht einen automatischen Login auf Cisco-Switche inkl. automatischem „enable“ (sofern die beiden Kennwörter gleich sind).

```
#!/usr/bin/expect -f
#####################################
## Update Router Config
#####################################
set host [lindex $argv 0]
set pw XXXX
trap exit {SIGINT SIGTERM}
spawn telnet $host

expect {
"Username: " {
        send "root\r"
exp_continue
}
"Password: " {
        send "$pw\r"
}
timeout {
        send_user "\n\ntimeout...\n"
        exit 1
}
}

expect {
"% " {
        send_user "\n\nlogin failed.\n"
        exit 1
}
">" {
        send "enable\r"
}
}
```

```
expect {
"Password: " {
        send "$pw\r"
}
timeout {
        send_user "\n\ntimeout...\n"
        exit 1
}
}

expect {
"% " {
        send_user "\n\nenable failed.\n"
        exit 1
}
"#" {
send_user "\nlogged in...\n"
send "\n"
}
}

interact
```
