

mysqltuner - MySQL Performance Tuning Check-Script

MySQLTuner is ein Perlscript, das versucht die MySQL Konfiguration zu prüfen und Vorschläge zum Tuning auf Basis der laufenden Installation zu machen.

Installation:

```
wget -O mysqltuner.pl http://mysqltuner.pl,  
chmod u+x mysqltuner.pl
```

----- Recommendations -----

General recommendations:

We will suggest raising the 'join_buffer_size' until JOINS not using indexes are found.

See <https://dev.mysql.com/doc/internals/en/join-buffer-size.html>

(specially the conclusions at the bottom of the page).

Variables to adjust:

join_buffer_size (> 4.0M, or always use indexes with JOINS)
